RE: Ozone Reduction Contingency Plan

Dear Ms. Gamper:

The purpose of this letter is to advise the Bureau that no revision to the ozone contingency plan in place is necessary at this time.

Anschutz Pinedale Corporation currently operates (6) wells on the Pinedale Anticline and does not have drilling operations planned for this winter. The attached contingency plan is based on our limited operations. As our activity level changes, updates to the plan will be submitted.

Please call me if you have any questions in this regard.

Sincerely,
Anschutz Pinedale Corporation

Jerry Gentry
Drilling Manager

**Anschutz Pinedale Corporation
Emergency Short-Term Emission Reduction Contingency Plan**

Objective The objective of this plan is to employ additional short term measures to reduce VOC and NOx emissions upon receiving notice from the Air Quality Division (AQD) of a pending high ozone forecast.

Contacts Listed below are the Anschutz Pinedale Corporation's contacts for Pinedale operations.

Bob Griffin	Field Supervisor	cell (307)789-1564
Jerry Gentry	Drilling Manager	cell (303)915-0651 Office (303)298-1000
Galen Benize	Engineering Manager	cell (303)249-1931 Office (303)298-1000

Implementation Upon receiving notice from the AQD of a pending high ozone forecast the following measures will be implemented.

- Pumpers will be asked to limit all non-critical truck traffic.
- Non-essential construction or maintenance activities will be deferred, if possible.
- Essential truck traffic will take extra measure limit idling.
- These measures will be implemented along with the existing measures Anschutz Pinedale Corporation has in place to limit VOC and NOx emissions.
