## PAPA Annual Planning Meeting Ten Year Plan August 2014

• people • strategy • assets

<sup>a</sup> different kind of  
oil & natural gas  
company

## ■ 2014 - 2016

- *Two wells planned for 2015.*

## ■ 2016 - 2024

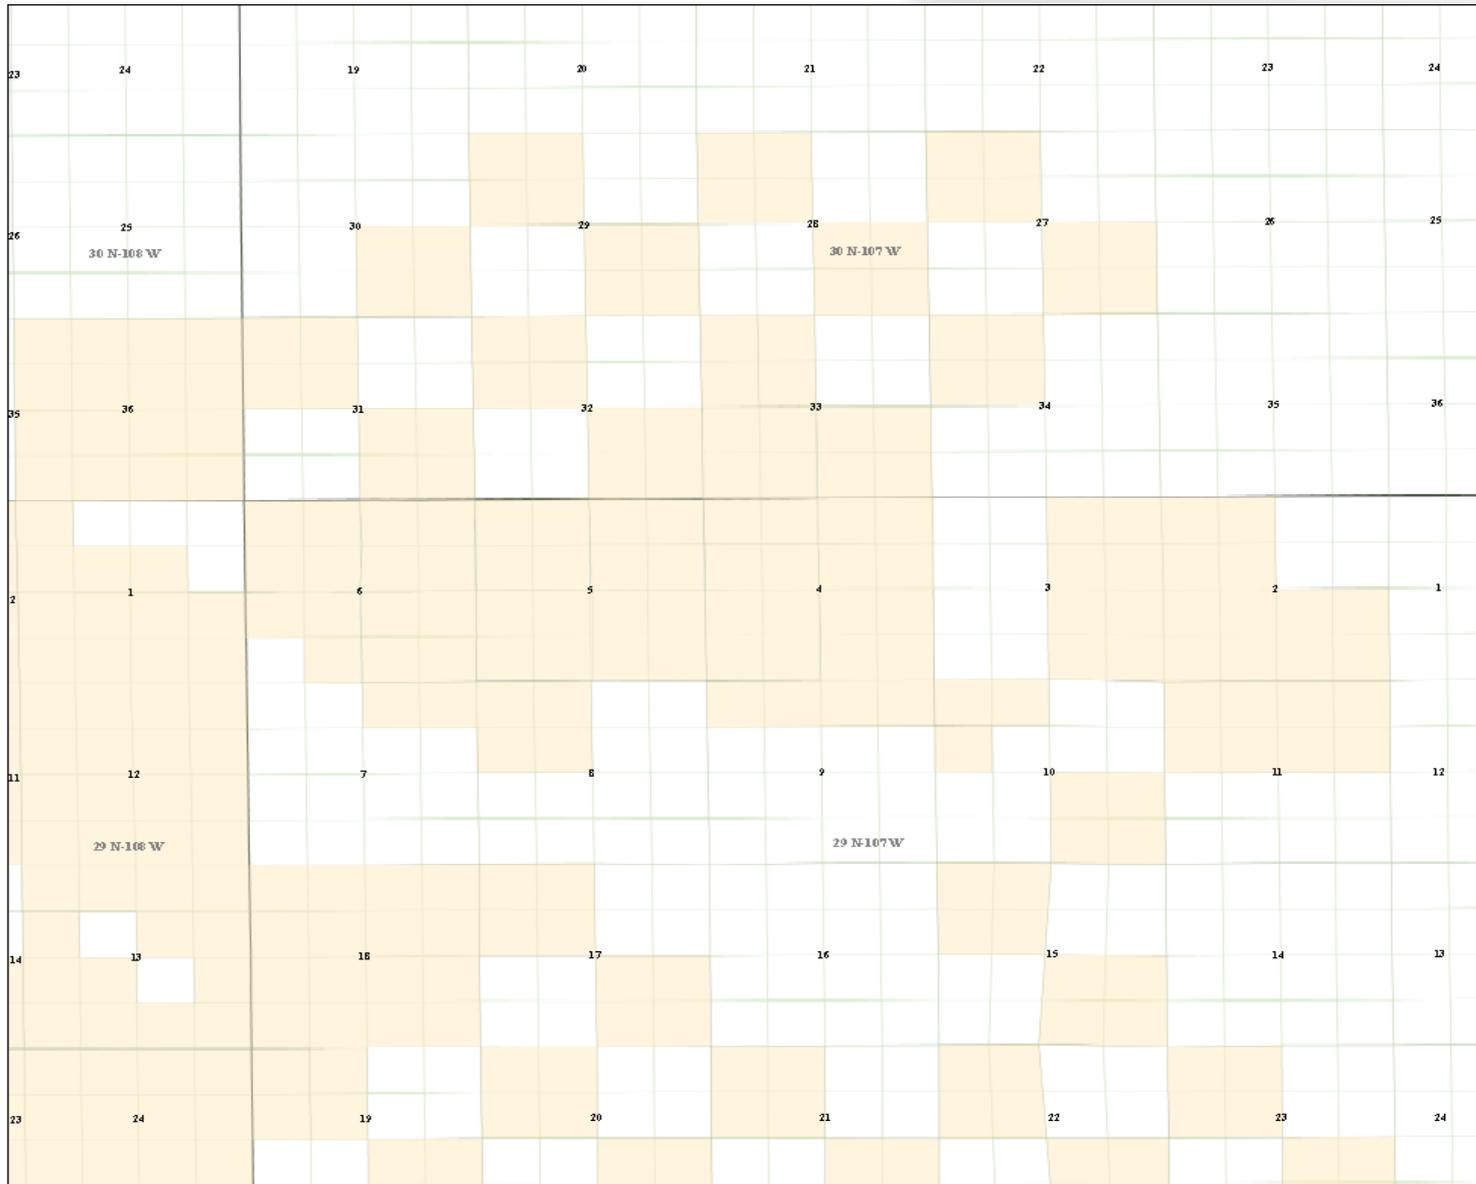

- *LINN has identified 24 potential well locations in addition to the two anticipated in 2015.*
- *It is anticipated that these wells will be drilled within the next ten years; however, LINN does not yet have a definitive schedule beyond 2015.*

## ■ Rig Count

- *LINN does not anticipate more than one rig running in the PAPA at any given time over the next ten year period.*

## ■ Existing Wells

- *LINN operates 33 wells in the PAPA.*
- *31 of these wells are currently producing.*

## ■ Current Staff

- *LINN employs 57 people on a full-time basis in its Jonah Field Office (excludes drilling and completion consultants).*
- *28 employees in Pinedale/Boulder area*
- *7 employees in Farson/Eden area*
- *13 employees in Rock Springs/Green River area*
- *5 employees in Big Piney/LaBarge area*
- *2 employees in Lander area*

## ■ Future Staffing Needs

- *Staff increases will be tied to development in Jonah Field and depend on producing well count, special projects and staff levels required to operate in a safe, prudent manner.*

Through consultation with Wyo DEQ, LINN Energy's OCP commits to voluntarily reduce emissions on ozone days by:

- *Training; yearly LINN training on ozone reduction and OCP. (LINN also hosted a meeting with contractors outlining the OCP.)*
- *Commit to evening fueling and not to overfill tanks.*
- *Commit to no idling of LINN vehicles on ozone action days*
- *Commit to reduce speeds by 5 mph on ozone action days*
- *Commit to eliminate ancillary equipment on ozone action days*
- *Commit to postpone truck hauls, unless necessary to prevent spills*
- *Commit to postpone construction activities*
- *Commit to postpone initiation of completions/workovers*
- *Commit to postpone blow down/venting, except for emergencies*
- *Commit comprehensive leak detection program, FLIR and SNOOP*

## Emission Reduction Efforts:

*LINN Energy completed electrification of the Liquids Gathering System (LGS) and associated injection well. Removing the CAT engine from the LGS reduced NOx emissions by 8 tons per year and VOC by 4.5 tons per year.*

*It is envisioned that electrification of nearby well sites is a future possibility resulting in additional reductions of NOx and VOC's.*

LINN Energy's mission is to  
**acquire, develop and maximize**  
**cash flow** from a growing portfolio  
of long-life oil and natural gas assets.
