

Pinedale Anticline Transportation Task Group Meeting

Meeting minutes for 05/03/05
Board Room Sublette County Library, Pinedale, Wyoming

- Attendees, see attached form. No general public's attended the meeting.
Charles Price, Richard Kail and Bill Wadsworth
- Charles started meeting by talking about PAWG meeting 2 issues:
 - Culverts (placement and maintenance)
 - How much Hazmat is transported on state highways?
- The Task group discussed how liquids are being moved truck vs. pipeline.
To date all liquid condensate is transported via truck to LaBarge and then piped to refinery in Salt Lake valley.
- A single pipeline system to transport all the condensate and produced water is possible, but not very probable due to the free market enterprise issues.
- The Questar condensate and produced water pipeline systems were discussed. Basic problems are metering, pumping and pressure.
- Road surfacing applications were discussed including Magnesium Chloride and Lignin Sulfonate.
- Charles to write letter bringing attention to the amount of condensate and produced water predicted to come from the Pinedale Anticline in the future.
- Next Transportation TG meeting 06/07/05 Sublette County Library at 1 p.m.
- Meeting adjourned:

Certified as Accurate
Chairman Transportation Task Group
