Collect Baseline Data

Monitoring Studies being conducted include

Migration Routes	
<input type="checkbox"/>	2005 - Mule Deer Collaring Study, phase 1 (baseline)
<input type="checkbox"/>	2007 - Mule Deer Collaring Study, phase 2 (1'st trend data)
Crucial Winter Range	
<input type="checkbox"/>	2009 - Vegetation condition study in areas known to be occupied by mule deer
Sage and Sharp tailed Grouse	
<input type="checkbox"/>	2007 - Collaring Study phase 1
<input type="checkbox"/>	2008 - Collaring Study phase 2
<input type="checkbox"/>	2008 - Raven predation study
<input type="checkbox"/>	2009 - Collaring Study phase 3
<input type="checkbox"/>	2009 - Surveys to determine sage grouse locations and winter habitat
Muddy Creek Sensitive Fish	
<input type="checkbox"/>	2005 – Habitat associations and fish species in Upper Muddy Creek
<input type="checkbox"/>	2005 – Fish distribution and characterization of flow regime
<input type="checkbox"/>	2005 – Wyoming Game and Fish – native non-game population inventory
<input type="checkbox"/>	2006 – Genetics research on 3 warm water fishes
<input type="checkbox"/>	2007 – Fish population estimate and movement barrier in Muddy Creek
<input type="checkbox"/>	2008 – Selenium Study, biotic and abiotic elements of the aquatic environment
<input type="checkbox"/>	2008 – Hydrologic watershed assessment of Muddy Creek
<input type="checkbox"/>	2008 – Aquatic habitat component monitoring – 3'rd party contractor
<input type="checkbox"/>	2009 – WETT testing of Double Eagle surface discharge – 3 iterations to date
Shrub Dependent Song Birds	
<input type="checkbox"/>	2008 – Collaborative breeding bird study between WyGF, BLM and the companies (3'rd party contractor)
<input type="checkbox"/>	2009 – 2'nd year of collaborative breeding bird studies
