

Applicant's Interests & Objectives

Serve native load: Ensure sufficient firm point-to-point and network transmission capacity is available to meet the electric demands of all its customers now and into the future.

Serve third-party network customers: Provide reliable transmission service to third parties to the degree transmission capacity is available.

Ensure reliability: Provide redundancy during transmission and generation contingencies for other planned and existing transmission segments, thereby providing operational flexibility for the bulk electric system, ensuring reliability, and supporting capacity ratings for each segment.

Access to energy resources: Provide the Applicant with access to diverse generation resources throughout its service territory needed to meet the growing electrical demands of its customers.
