October 6, 2004

Dear Reader:

The Bureau of Land Management (BLM), Lander field Office prepared an Environmental Analysis (EA) for gathering wild horses in the Muskrat Basin, Rock Creek Mountain, Dishpan Butte and Conant Creek Wild Horse Herd Management Areas. This EA was provided to all interested publics prior to August 2, 2004 with a 30 day public comment period. The comment period ended on September 5, 2004.

Based upon the analysis in the EA and the public comments, we have prepared the enclosed Decision Record and Finding of No Significant Impact. This Decision Record/FONSI outlines the decision and rationale for that decision. It is being sent to all of the interested public that received the EA for comment. If you have any questions, you may contact the BLM at the above address or contact Roy Packer at 307-332-8400.

Sincerely,

/s/ Rubel Vigil
Assistant Lander Field Manager

DECISION RECORD
and
FINDING OF NO SIGNIFICANT IMPACT
for the
North Lander HMA Complex
(Conant Creek, Rock Creek Mountain, Dishpan Butte and Muskrat Basin)
Capture/Removal
Lander Field Office

EA Number WY-050-EA4-061

FINDING OF NO SIGNIFICANT IMPACT

I have determined that the Proposed Action is in conformance with the approved land use plan. I have reviewed this environmental assessment, including the analyses of potentially significant environmental impacts. I have determined that the Proposed Action, with the mitigation measures identified, will not have any significant impacts on the human environment and that an EIS is not required. It is my decision to implement the Proposed Action with the mitigation measures identified.

FULL FORCE AND EFFECT DECISION

It is my decision to approve the Proposed Action as described in the Environmental Assessment (EA) for Wild horse Gathering of the North Lander HMA Complex (Conant Creek, Rock Creek Mountain, Dishpan Butte and Muskrat Basin HMA's). The Bureau of Land Management (BLM) will remove approximately 270 horses from the Herd Management Areas (HMAs). Excess wild horses will be gathered and removed according to the Wild Horse Gathering Plan. The gather operations will begin after October 1, 2004 and end upon completion of the project. The gathering operation is expected to require approximately two weeks.

Removal of excess wild horses will leave wild horse populations in conformance with the appropriate management levels established for each HMA in the Lander Field Office.

I have reviewed my responsibilities under existing laws, regulations, policies, and land use decisions, and my decision is consistent with them.

RATIONALE FOR DECISION

My decision to approve gathering and removal of excess wild horses is based upon the following:

The decisions in the Lander Herd Management Area Evaluation/Capture plan provide for maintaining an Appropriate Management Level (AML) of 320 - 536 horses within the HMAs. The February and March, 2004 wild horse inventory and the projected post 2004 foaling population indicates that wild horse numbers in the HMAs are above the AML. The Lander Resource Management Plan (RMP) and the Lander Herd Management Area Evaluation sets objectives and identifies management actions which will be carried out to maintain a thriving, natural, ecological balance and to preserve the multiple-use relationship that exists in the areas occupied by wild horses. Management in accordance with these objectives is needed to maintain the health of public rangelands. The wild horses and other animals rely on these public rangelands to maintain populations at levels that insure the health and viability of the herds and prevent unwanted damage to state and privately owned land. In order to achieve these objectives, it is necessary to remove excess horses from the Muskrat Basin, Conant Creek, Rock Creek Mountain, and Dishpan Butte HMA's. For this reason, all horses above the AML are considered excess and subject to removal. Gathering wild horses to achieve and maintain AML's is in conformance with the land use plan.

Based on the analysis in EA No. WY-050-EA4-061, the impacts to the wild horses and to other resources will not be significant. This gather will not reduce the populations in the HMA's below AML. The gather will be conducted in accordance with established procedures and will use proven methods. This will insure that the horses will be treated in a safe and humane manner. Population modeling developed by Dr. Stephen Jenkins affirmed all conclusions regarding population demographics. Safety risks to BLM employees and the wild horses will be minimized through the planned actions identified in the Gathering Plan.

PUBLIC COMMENTS ON THE EA

Public comments on the EA were accepted until close of business September 5, 2004. Two comment letters were received. The comment letters supported removal operations to the lower level of the AML for each HMA.

COMPLIANCE AND MONITORING

Gathering and removal of excess wild horses will be conducted as described in the gathering plan. The BLM will continue to monitor wild horse numbers, utilization, and range conditions to achieve the multiple use objectives within the wild horse herd management areas.

APPEALS

This decision is issued in full force and effect in accordance with 43 CFR 4770.3(c) which states in part: "decisions ...shall be effective upon issuance or on a date established in the decision." This decision is issued in accordance with 43 CFR 4700.0-1. Administrative remedies are provided at 43 CFR 4770.3(a) which states: Any person who is adversely affected by a decision of the authorized officer in the administration of these regulations may file an appeal. If you wish to appeal this decision, as provided by 43 CFR 4770.3 and 43 CFR 4.21, you must file an appeal in writing within 30 days of receipt of this decision with the BLM Lander Field Office, P.O. Box 589, Lander, Wyoming 82520. The appeal shall state clearly and concisely why you

think the decision is in error.

Should you wish to file a motion for stay, the appellant shall show sufficient justification based on the following standards:

1. The relative harm to the parties if the stay is granted or denied;
2. The likelihood of the appellant's success on the merits;
3. The likelihood of immediate and irreparable harm if the stay is not granted; and
4. Whether the public interest favors granting the stay.

If you decide to also submit a petition for stay of the decision , a copy of the notice of appeal, statement of reason, and petition for stay should be simultaneously filed with the Office of the Field Solicitor, Rocky Mountain Region, 755 Parfet Street, Suit 151, Lakewood, Colorado 80215.

/s/ Rubel Vigil
