February 2013 LEASE PARCELS DOI-BLM-WY-R010-2012-0087-EA

Master Leasing Plan (MLP) Checklist for Oil and Gas Lease Parcels (WRBB District February 2013 Parcels)

Washington Office Instruction Memorandum 2010-117 introduces the Master Leasing Plan (MLP) concept as a mechanism for completing the additional planning, analysis, and decision-making that may be necessary for areas meeting the listed criteria. *The MLP process will be conducted through the NEPA process using an interdisciplinary team that will coordinate and/or consult with the public and other stakeholders that may be affected by the BLM's MLP decisions. The MLP will ordinarily be initiated as a land use plan amendment. However, if it is anticipated that the likely outcome of the MLP will not result in the creation of new lease stipulations or changes to existing RMP decisions warranting a plan amendment, it may not be necessary to initiate the MLP as a plan amendment. The MLP process may also be combined with a plan revision process if schedules permit. **The preparation of an MLP is required when all FOUR of the following criteria are met:***

- *A substantial portion of the area to be analyzed in the MLP is not currently leased.*
- *There is a majority Federal mineral interest.*
- *The oil and gas industry has expressed a specific interest in leasing, and there is a moderate or high potential for oil and gas development confirmed by the discovery of oil and gas in the general area.*
- *Additional analysis or information is needed to address likely resource or cumulative impacts if oil and gas development were to occur where there are:*
 - *multiple-use or natural/cultural resource conflicts;*
 - *impacts to air quality;*
 - *impacts on the resources or values of any unit of the National Park System, national wildlife refuge, or National Forest wilderness area, as determined after consultation or coordination with the NPS, the FWS, or the FS; or*
 - *impacts on other specially designated areas.*

Field Office	PARCEL No. 1302	Parcel Offer/Defer/Partial	CBM Potential	Conventional Potential	Parcel in an Area that is Substantially Unleased (Y/N)	Parcel in an area with a Majority Federal Mineral Interest (Y/N)	Industry has expressed Specific Interest in Leasing & there is a Confirmed Moderate to High Potential for O&G Development (Y/N)	Additional Analysis Needed to Address Resource or Cumulative Impacts if O&G Development were to occur				Need MLP ?
