

Appendix A

for the

**August 2015 Lease Parcel EA
DOI-BLM-WY-R000-2015-0001-EA**

Parcel Descriptions with Stipulations

The nominated parcels are listed below with the stipulations that would be applied under Alternative 2. These stipulations are consistent with approved Resource Management Plans for the Cody, Lander, and Worland (Washakie and Grass Creek) Field Offices. Included are the parcels that would be recommended for deferral under Alternative 3 for reasons as identified in the EA and summarized in Appendix D - Offer and Deferral Summary.

Cody Field Office

WY-1508-220 404.490 Acres
T.0560N, R.0990W, 06th PM, WY
Sec. 001 LOTS 9,10;
 006 LOTS 3,5,6,11-14;
 006 E2SW;

CSU (1) Surface occupancy or use may be restricted or prohibited if paleontological sites exist unless paleontological sites are avoided or the operator and surface managing agency arrive at an acceptable plan for mitigation of anticipated impacts; (2) as mapped on the Cody Field Office GIS database; (3) protecting significant Bighorn Basin paleontological resources.

TLS (1) Feb 1 to Jul 31; (2) as mapped on the Cody Field Office GIS database; (3) protecting nesting Greater sage-grouse, migratory birds and Raptors.

DEFER PART: IM WY-2012-019 Greater sage-grouse screen, parcel is recommended for partial deferral pending completion of the Resource Management Plan Revision. Defer due to protection of Greater Sage-grouse and as a result of the Greater sage-grouse screening process. Sage Grouse Deferred Parcels are not further analyzed. See Chapter 1.7, Issues Considered and Eliminated From Further Analysis.

Lease Stipulation No. 3

TLS Surface disturbing and disruptive activities are restricted or prohibited within 1 mile of bald/golden eagle and ferruginous hawk nests and $\frac{3}{4}$ mile of all other active raptor nests (1) as mapped on the Lander Field Office GIS database; (2) during the following time periods:

- April 1 to August 31 for northern goshawk
- April 1 to September 15 for burrowing owl
- February 1 to August 15 for bald and/or golden eagles
- February 1 to July 31 for all other raptors

(3) for the protection of active raptor and/or eagle nests. TLS Surface-disturbing and disruptive activities are restricted or prohibited within 0.25 mile of identified mountain plover habitat (1) as mapped on the Lander GIS database; (2) April 10 - July 10; (3) for the protection of mountain plover nesting habitat.

TLS Surface disturbing and disruptive activities are restricted or prohibited (1) March 15 - June 30; (2) as mapped on the Lander Field Office GIS database; (3) to seasonally protect Greater Sage-Grouse breeding, nesting and early brood-rearing habitats from disruptive activities inside designated core areas.

TLS Surface disturbing and disruptive activities are restricted or prohibited (1) December 1 - March 14; (2) as mapped on the Lander Field Office GIS database; (3) to seasonally protect Greater Sage-Grouse winter concentration areas within designated core areas, and outside designated core areas when supporting wintering Greater Sage-Grouse that nest within designated core areas.

CSU Surface occupancy or use will be restricted to no more than an average of one disturbance location per 640 acres using the DDCT, and the cumulative value of all applicable surface disturbances, existing or future, must not exceed 5 percent of the DDCT area, as described in the Disturbance Density Calculation Tool manual (DDCT); (2) as mapped on the Lander Field Office GIS database; (3)

To protect Greater Sage-Grouse designated core areas from habitat fragmentation and loss.

This lease does not guarantee the lessee the right to occupy the surface of the lease for the purpose of producing oil and natural gas within Greater Sage-Grouse designated core areas. The surface occupancy restriction criteria identified in this stipulation may preclude surface occupancy and may be beyond the ability of the lessee to meet due to existing surface disturbance on Federal, State, or private lands within designated core areas or surface disturbance created by other land users. The BLM may require the lessee or operator to enter into a unit agreement or drilling easement to facilitate the equitable development of this and surrounding leases. (For guidance on the use of this stipulation, see Bureau of Land Management Manuals 1624 and 3101.)

CSU Surface occupancy or use will be restricted in areas identified as limited reclamation potential soils (1) as mapped on the Lander Field Office GIS database; (2) for the protection of sensitive soil resources.

NSO No surface occupancy or use is allowed on slopes greater than 25 percent (1) as mapped on the Lander Field Office GIS database; (2) protecting areas containing slopes greater than 25%.

TLS Surface disturbing and disruptive activities within identified big game crucial winter range are prohibited (1) November 15 - April 30; (2) as mapped on the Lander Field Office database; (3) protecting big game crucial winter range.

TLS Surface disturbing and disruptive activities are restricted or prohibited within 1 mile of bald/golden eagle and ferruginous hawk nests and $\frac{3}{4}$ mile of all other active raptor nests (1) as mapped on the Lander Field Office GIS database; (2) during the following time periods:

- April 1 to August 31 for northern goshawk
- April 1 to September 15 for burrowing owl
- February 1 to August 15 for bald and/or golden eagles
- February 1 to July 31 for all other raptors

(3) for the protection of active raptor and/or eagle nests.

TLS Surface disturbing and disruptive activities are restricted or prohibited (1) March 15 - June 30; (2) as mapped on the Lander Field Office GIS database; (3) to seasonally protect Greater Sage-Grouse breeding, nesting and early brood-rearing habitats from disruptive activities inside designated core areas.

TLS Surface disturbing and disruptive activities are restricted or prohibited (1) December 1 - March 14; (2) as mapped on the Lander Field Office GIS database; (3) to seasonally protect Greater Sage-Grouse winter concentration areas within designated core areas, and outside designated core areas when supporting wintering Greater Sage-Grouse that nest within designated core areas.

TLS Surface-disturbing and disruptive activities are restricted or prohibited within 0.25 mile of identified mountain plover habitat (1) as mapped on the Lander GIS database; (2) April 10 - July 10; (3) for the protection of mountain plover nesting habitat.

CSU Surface occupancy or use will be restricted in areas identified as limited reclamation potential soils (1) as mapped on the Lander Field Office GIS database; (2) for purposes of protecting sensitive soil resources.

CSU Surface occupancy or use will be restricted on slopes between 15 and 24 percent (1) as mapped on the Lander Field Office GIS database; (2) to protect areas containing slopes between 15 and 24 percent.

CSU Surface occupancy or use will be restricted to no more than an average of one disturbance location per 640 acres using the DDCT, and the cumulative value of all applicable surface disturbances, existing or future, must not exceed 5 percent of the DDCT area, as described in the Disturbance Density Calculation Tool manual (DDCT); (2) as mapped on the Lander Field Office GIS database; (3) To protect Greater Sage-Grouse designated core areas from habitat fragmentation and loss.

This lease does not guarantee the lessee the right to occupy the surface of the lease for the purpose of producing oil and natural gas within Greater Sage-Grouse designated core areas. The surface occupancy restriction criteria identified in this stipulation may preclude surface occupancy and may be beyond the ability of the lessee to meet due to existing surface disturbance on Federal, State, or private lands within designated core areas or surface disturbance created by other land users. The BLM may require the lessee or operator to enter into a unit agreement or drilling easement to facilitate the equitable development of this and surrounding leases. This lease does not guarantee the lessee the right to occupy the surface of the lease for the purpose of producing oil and natural gas within Greater Sage-Grouse designated core areas. The surface occupancy restriction criteria identified in this stipulation may preclude surface occupancy and may be beyond the ability of the lessee to meet due to existing surface disturbance on Federal, State, or private lands within designated core areas or surface disturbance created by other land users. The BLM may require the lessee or operator to enter into a unit agreement or drilling easement to facilitate the equitable development of this and surrounding leases. (For guidance on the use of this stipulation, see Bureau of Land Management Manuals 1624 and 3101.)

CSU Surface use or occupancy will be restricted within designated "very high" or "high" potential fossil yield classification areas (1) as mapped on the Lander Field Office GIS database; (2) for the protection of fossil resources.

CSU Surface occupancy or use will be restricted on slopes between 15 and 24 percent (1) as mapped on the Lander Field Office GIS database; (2) to protect areas containing slopes between 15 and 24 percent.

Lease Notice No. 3

Lease Stipulation No. 1

Lease Stipulation No. 2

Lease Stipulation No. 3

NSO No surface occupancy or use within 200 feet of occupied pygmy rabbit habitat (1) as mapped in the Lander Field Office GIS database; (2) for the protection of occupied pygmy rabbit habitat.

NSO No surface-disturbing activities or surface occupancy is allowed within an 0.6-mile radius of the perimeter of occupied greater sage-grouse leks in Core Area (1) as mapped on the Lander Field Office GIS database; (2) to protect occupied greater sage-grouse leks and associated seasonal habitat, life-history, or behavioral needs of greater sage-grouse in proximity to leks from habitat fragmentation and loss, and protect greater sage-grouse populations from disturbance inside designated Core Area.

NSO No surface occupancy or use is allowed within designated Sacred, Spiritual, and TCPs, (1) T.0250N, R.0930W, 06th PM, WY, Sec. 001, LOTS 1-4; 001, S2N2,S2; 002, LOTS 1-4; 002, S2N2,S2; (2) for the protection of Sacred, Spiritual, and TCPs.

TLS Surface disturbing and disruptive activities are restricted or prohibited within 1 mile of bald/golden eagle and ferruginous hawk nests and $\frac{3}{4}$ mile of all other active raptor nests (1) as mapped on the Lander Field Office GIS database; (2) during the following time periods:

- April 1 to August 31 for northern goshawk
- April 1 to September 15 for burrowing owl
- February 1 to August 15 for bald and/or golden eagles
- February 1 to July 31 for all other raptors

(3) for the protection of active raptor and/or eagle nests.

TLS Surface-disturbing and disruptive activities are restricted or prohibited within 0.25 mile of identified mountain plover habitat (1) as mapped on the Lander GIS database; (2) April 10 - July 10, and (3) for the protection of mountain plover nesting habitat.

TLS Surface disturbing and disruptive activities are restricted or prohibited (1) March 15 - June 30; (2) as mapped on the Lander Field Office GIS database; (3) to seasonally protect Greater Sage-Grouse breeding, nesting and early brood-rearing habitats from disruptive activities inside designated core areas.

TLS Surface disturbing and disruptive activities are restricted or prohibited (1) December 1 - March 14; (2) as mapped on the Lander Field Office GIS database; (3) to seasonally protect Greater Sage-Grouse winter concentration areas within designated core areas, and outside designated core areas when supporting wintering Greater Sage-Grouse that nest within designated core areas.

CSU Surface occupancy or use will be restricted to no more than an average of one disturbance location per 640 acres using the DDCT, and the cumulative value of all applicable surface disturbances, existing or future, must not exceed 5 percent of the DDCT area, as described in the Disturbance Density Calculation Tool manual (DDCT); (2) as mapped on the Lander Field Office GIS database; (3) To protect Greater Sage-Grouse designated core areas from habitat fragmentation and loss.

This lease does not guarantee the lessee the right to occupy the surface of the lease for the purpose of producing oil and natural

gas within Greater Sage-Grouse designated core areas. The surface occupancy restriction criteria identified in this stipulation may preclude surface occupancy and may be beyond the ability of the lessee to meet due to existing surface disturbance on Federal, State, or private lands within designated core areas or surface disturbance created by other land users. The BLM may require the lessee or operator to enter into a unit agreement or drilling easement to facilitate the equitable development of this and surrounding leases. (For guidance on the use of this stipulation, see Bureau of Land Management Manuals 1624 and 3101.)

Formerly Lease No.

Stipulations:

Lease Notice No. 1

Lease Notice No. 2

Lease Notice No. 3

Lease Stipulation No. 1

Lease Stipulation No. 2

Lease Stipulation No. 3

NSO No surface use or occupancy is allowed within 0.25 mile of National Register of Historic Places-eligible Native America cultural resource sites (1) as mapped on the Lander Field Office GIS database; (2) for the protection of Native American spiritual and/or cultural values.

CSU Surface occupancy or use is restricted within designated VRM Class I and II areas (1) as mapped on the Lander Field Office GIS database; (2) for the protection of VRM Class I and II areas.

TLS Surface disturbing and disruptive activities are restricted or prohibited within 1 mile of bald/golden eagle and ferruginous hawk nests and $\frac{3}{4}$ mile of all other active raptor nests (1) as mapped on the Lander Field Office GIS database; (2) during the following time periods:

- April 1 to August 31 for northern goshawk
- April 1 to September 15 for burrowing owl
- February 1 to August 15 for bald and/or golden eagles
- February 1 to July 31 for all other raptors

(3) for the protection of active raptor and/or eagle nests.

TLS Surface-disturbing and disruptive activities are restricted or prohibited within 0.25 mile of identified mountain plover habitat (1) as mapped on the Lander GIS database; (2) April 10 - July 10; (3) for the protection of mountain plover nesting habitat.

TLS Surface disturbing and disruptive activities are restricted or prohibited (1) March 15 - June 30; (2) as mapped on the Lander Field Office GIS database; (3) to seasonally protect Greater Sage-Grouse breeding, nesting and early brood-rearing habitats from disruptive activities inside designated core areas.

TLS Surface disturbing and disruptive activities are restricted or prohibited (1) December 1 - March 14; (2) as mapped on the Lander Field Office GIS database; (3) to seasonally protect Greater Sage-Grouse winter concentration areas within designated core areas, and outside designated core areas when supporting wintering Greater Sage-Grouse that nest within designated core areas.

CSU Surface occupancy or use will be restricted in areas identified as limited reclamation potential soils (1) as mapped on the Lander Field Office GIS database; (2) for purposes of protecting sensitive soil resources.

CSU Surface occupancy or use will be restricted on slopes between 15 and 24 percent (1) as mapped on the Lander Field Office GIS database; (2) to protect areas containing slopes between 15 and 24 percent.

CSU Surface occupancy or use will be restricted on 121,255 acres in the Beaver Rim Master Leasing Plan area (1) as mapped on the Lander Field Office GIS database; (2) for the protection of unique plant communities, cultural sites, viewshed, geologic resources, wild horse migration routes, and riparian-wetland resources of the Beaver Rim Master Leasing Plan area.

CSU Surface occupancy or use will be restricted to no more than an average of one disturbance location per 640 acres using the DDCT, and the cumulative value of all applicable surface disturbances, existing or future, must not exceed 5 percent of the DDCT area, as described in the Disturbance Density Calculation Tool manual (DDCT); (2) as mapped on the Lander Field Office GIS database; (3) To protect Greater Sage-Grouse designated core areas from habitat fragmentation and loss.

This lease does not guarantee the lessee the right to occupy the surface of the lease for the purpose of producing oil and natural gas within Greater Sage-Grouse designated core areas. The surface occupancy restriction criteria identified in this stipulation may preclude surface occupancy and may be beyond the ability of the lessee to meet due to existing surface disturbance on Federal, State, or private lands within designated core areas or surface disturbance created by other land users. The BLM may require the lessee or operator to enter into a unit agreement or drilling easement to facilitate the equitable development of this and surrounding leases. (For guidance on the use of this stipulation, see Bureau of Land Management Manuals 1624 and 3101.)

CSU Surface use or occupancy will be restricted within a 2-mile buffer of RHT&EHs (1) as mapped on the Lander Field Office GIS database; (2) for the protection of the RHT&EHs and their settings.

CSU Surface occupancy or use will be restricted in areas identified as limited reclamation potential soils (1) as mapped on the Lander Field Office GIS database; (2) for purposes of protecting sensitive soil resources.

CSU Surface occupancy or use will be restricted on slopes between 15 and 24 percent (1) as mapped on the Lander Field Office GIS database; (2) to protect areas containing slopes between 15 and 24 percent.

CSU Surface occupancy or use will be restricted on 121,255 acres in the Beaver Rim Master Leasing Plan area (1) as mapped on the Lander Field Office GIS database; (2) for the protection of unique plant communities, cultural sites, viewshed, geologic resources, wild horse migration routes, and riparian-wetland resources of the Beaver Rim Master Leasing Plan area.

CSU Surface occupancy or use will be restricted to no more than an average of one disturbance location per 640 acres using the DDCT, and the cumulative value of all applicable surface disturbances, existing or future, must not exceed 5 percent of the DDCT area, as described in the Disturbance Density Calculation Tool manual (DDCT); (2) as mapped on the Lander Field Office GIS database; (3)

To protect Greater Sage-Grouse designated core areas from habitat fragmentation and loss.

This lease does not guarantee the lessee the right to occupy the surface of the lease for the purpose of producing oil and natural gas within Greater Sage-Grouse designated core areas. The surface occupancy restriction criteria identified in this stipulation may preclude surface occupancy and may be beyond the ability of the lessee to meet due to existing surface disturbance on Federal, State, or private lands within designated core areas or surface disturbance created by other land users. The BLM may require the lessee or operator to enter into a unit agreement or drilling easement to facilitate the equitable development of this and surrounding leases. (For guidance on the use of this stipulation, see Bureau of Land Management Manuals 1624 and 3101.)

CSU Surface use or occupancy will be restricted within a 2-mile buffer of RHT&EHs (1) as mapped on the Lander Field Office GIS database; (2) for the protection of the RHT&EHs and their settings. CSU Surface use or occupancy will be restricted within designated "very high" or "high" potential fossil yield classification areas (1) as mapped on the Lander Field Office GIS database; (2) for the protection of fossil resources.

This lease does not guarantee the lessee the right to occupy the surface of the lease for the purpose of producing oil and natural gas within Greater Sage-Grouse designated core areas. The surface occupancy restriction criteria identified in this stipulation may preclude surface occupancy and may be beyond the ability of the lessee to meet due to existing surface disturbance on Federal, State, or private lands within designated core areas or surface disturbance created by other land users. The BLM may require the lessee or operator to enter into a unit agreement or drilling easement to facilitate the equitable development of this and surrounding leases. (For guidance on the use of this stipulation, see Bureau of Land Management Manuals 1624 and 3101.)

CSU Surface use or occupancy will be restricted within designated "very high" or "high" potential fossil yield classification areas (1) as mapped on the Lander Field Office GIS database; (2) for the protection of fossil resources.

Stipulations:

Lease Notice No. 1

Lease Notice No. 2

Lease Notice No. 3

Lease Stipulation No. 1

Lease Stipulation No. 2

Lease Stipulation No. 3

NSO No surface occupancy or use is allowed on slopes greater than 25 percent (1) as mapped on the Lander Field Office GIS database; (2) protecting areas containing slopes greater than 25%.

NSO No surface use or occupancy is allowed within the Hudson to Atlantic City area (1) entire lease; (2) for the protection of wildlife, cultural resources, viewshed, and/or recreational use(s) in the Hudson to Atlantic City area.

CSU Surface occupancy or use is restricted within designated Class I and II areas (1) as mapped on the Lander Field Office GIS database; (2) for the protection of VRM Class I and II areas.

NSO No surface use or occupancy is allowed within designated ACECs (1) as mapped on the Lander Field Office GIS database;(2) for purposes of protecting the relevant and important ACEC values.

TLS Surface disturbing and disruptive activities within identified big game crucial winter range are prohibited (1) November 15 - April 30; (2) as mapped on the Lander Field Office database; (3) protecting big game crucial winter range.

TLS Surface disturbing and disruptive activities are restricted or prohibited within 1 mile of bald/golden eagle and ferruginous hawk nests and ¾ mile of all other active raptor nests (1) as mapped on the Lander Field Office GIS database; (2) during the following time periods:

- April 1 to August 31 for northern goshawk
- April 1 to September 15 for burrowing owl
- February 1 to August 15 for bald and/or golden eagles
- February 1 to July 31 for all other raptors

(3) for the protection of active raptor and/or eagle nests.
TLS Surface-disturbing and disruptive activities are restricted or prohibited within 0.25 mile of identified mountain plover habitat (1) as mapped on the Lander GIS database; (2) April 10 - July 10; (3) for the protection of mountain plover nesting habitat.
TLS Surface disturbing and disruptive activities are restricted or prohibited (1) March 15 - June 30; (2) as mapped on the Lander Field Office GIS database; (3) to seasonally protect Greater Sage-Grouse breeding, nesting and early brood-rearing habitats from disruptive activities inside designated core areas.
TLS Surface disturbing and disruptive activities are restricted or prohibited (1) December 1 - March 14; (2) as mapped on the Lander Field Office GIS database; (3) to seasonally protect Greater Sage-Grouse winter concentration areas within designated core areas, and outside designated core areas when supporting wintering Greater Sage-Grouse that nest within designated core areas.
CSU Surface occupancy or use will be restricted in areas identified as limited reclamation potential soils (1) as mapped on the Lander Field Office GIS database; (2) for purposes of protecting sensitive soil resources.
CSU Surface occupancy or use will be restricted on slopes between 15 and 24 percent (1) as mapped on the Lander Field Office GIS database; (2) to protect areas containing slopes between 15 and 24 percent.
CSU Surface occupancy or use will be restricted to no more than an average of one disturbance location per 640 acres using the DDCT, and the cumulative value of all applicable surface disturbances, existing or future, must not exceed 5 percent of the DDCT area, as described in the Disturbance Density Calculation Tool manual (DDCT); (2) as mapped on the Lander Field Office GIS database; (3) To protect Greater Sage-Grouse designated core areas from habitat fragmentation and loss.
This lease does not guarantee the lessee the right to occupy the surface of the lease for the purpose of producing oil and natural gas within Greater Sage-Grouse designated core areas. The surface occupancy restriction criteria identified in this stipulation may preclude surface occupancy and may be beyond the ability of the lessee to meet due to existing surface disturbance on Federal, State, or private lands within designated core areas or surface disturbance created by other land users. The BLM may require the lessee or operator to enter into a unit agreement or drilling easement to facilitate the equitable development of this and surrounding leases. (For guidance on the use of this stipulation, see Bureau of Land Management Manuals 1624 and 3101.)
CSU Surface use or occupancy will be restricted within designated "very high" or "high" potential fossil yield classification areas (1) as mapped on the Lander Field Office GIS database; (2) for the protection of fossil resources.
