**FINDING OF NO SIGNIFICANT IMPACT/DECISION RECORD.**

**Decision**

I have reviewed this environmental assessment including the explanation and resolution of any potentially significant environmental impacts. I have selected the proposed action alternative with the mitigation measures described below for authorization and implementation. I have determined that the proposed project is in conformance with the approved land use plan. It is my decision to implement the project with the mitigation measures identified below.

**Finding of No Significant Impact**

Based upon the analysis of potential environmental impacts contained in the EA, I have determined that the impacts are not expected to be significant, and that an EIS is not required.

**Rationale for Decision**

Compared to the No Action Alternative, the Proposed Action Alternative best meets the Purpose & Need and guiding laws, regulations, and directives, including the Federal Land Policy and Management Act (FLPMA, 43 USC 35). The proposed action is in conformance with the Great Divide Resource Management Plan (RMP) and the Atlantic Rim Natural Gas Field Development Project EIS.

**Mitigation Measures/Remarks:**

All needed mitigation is part of the proposed action and can be found in the Sundry Notice applications and Conditions of Approval.

**Monitoring and Compliance**

Designated BLM personnel will monitor operations under authorizations for the proposed action as needed to ensure compliance with the Master Plan Elements and Conditions of Approval.
