

Chokecherry and Sierra Madre Wind Energy Project

Site-specific Environmental Assessment for Phase I Wind Turbine Development

The Chokecherry and Sierra Madre Wind Energy Project (CCSM) Environmental Impact Statement (EIS) and Record of Decision determined that over 200,000 acres within the CCSM Project Area are suitable for wind energy development subject to the requirements described under the Selected Alternative, but did not identify individual turbine or infrastructure component locations. Subsequent environmental assessments (EAs) tiered to the EIS will analyze site-specific plans of development. The first EA to be analyzed is for the infrastructure components and scoping was held from September 9 to November 4, 2013. The second EA will address the Phase I Wind Turbine Development. Scoping for the second EA will occur from December 6, 2013 through January 14, 2014.

| SITE-SPECIFIC ENVIRONMENTAL ASSESSMENTS | |
|--|--|
| Haul Road and Facilities for Phase I | Environmental Assessment 1 (Sept. 2013 – June 2014) |
| West Sinclair Rail Facility | |
| Road Rock Quarry | |
| Phase I Wind Turbine Development | Environmental Assessment 2 (Dec. 2013 – Sept. 2014) |
| Phase II Wind Turbine Development (including Haul Road and Facilities for Phase II) | Environmental Assessment 3 (dates to be determined) |
