FINDING OF NO SIGNIFICANT IMPACT

DOI-BLM-WY-R010-2011-0012-EA

Pogo Producing Co.

Right-of-way Application

WYW-165213

The proposed action is located in Big Horn County, Wyoming, and will allow Pogo Producing Co. to install a buried oil transportation pipeline from their Buffalo Gas Federal 23-1H well to a tie-in point of an existing Williston Basin Oil Pipeline. The pipeline facilities will consist of 12.545 acres more or less of disturbance. The construction of the pipeline and use of a site measuring 100' X 100' for use as a pig launching station, pipeline tie in and possible temporary construction staging area has been included in the review of the proposed project. Impacts were described for site specific, local and regional levels over the short and long term in DOI-BLM-WY-R010-2011-0012-EA.

I have reviewed this environmental assessment including the explanation and resolution of any potentially significant environmental impacts. I have determined that the proposed action will not have any significant impacts on the human environment and that an EIS is not required. I find that implementation of the proposed action would not result in unnecessary or undue degradation of the Public Lands. I have determined that the proposed action is in conformance with the appropriate approved land use plans. It is my decision to implement the proposed action, as modified by the recommended mitigation.
