Re: Protest of Dec. 2, 2008 Competitive Oil and Gas Sale

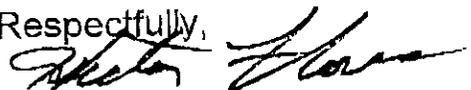

Protest of 14 parcels. Specific parcels protested including:  
Parcels WY-0812-177, WY 0812-178, WY-0812-179, WY-0812-180,  
WY-0812-181, WY-0812-182, WY-0812-183, WY-0812-186, WY-  
0812-187, WY-0812-188, WY-0812-189, WY-0812-190, WY-0812-  
191, and WY-0812-192.

Dear Director Simpson:

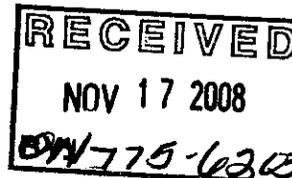

I am asking to please remove all the purposed lease parcels from the Dec. 2nd auction, because for 41 years old I have enjoyed camping, hunting, and fishing, as well now my own kids. That's where I've been teaching my elk calling and hunting skills to my kids, hoping they will teach their children the traditlon hoping they pass it on to them. And making their own memories and hunting stories. The 18,050 acres mean a lot to me.

I also like fishing and drilling will contaminate the water that we fish in. I don't appreciate it, all the trash that is left behind form those rigs. The air we breath, and landscape will never be the same. The water quality we drink or the future recreational opportunity will never be the same. The roads they tear up will never be the same. The future of are kids for them will never be the same. This concerns me. SO, I would appreciate if you pull all these posted parcels off the action. Especially hunting elk areas 30, 31, and 32. Thank you for letting us volce are concerns.

Respectfully,

Hector Flores

Dear Director Simpson:

Hello, my name is Hector Flores and I work in the oil field. Even though it is work, I would rather not have a job than to see Little Mountain trashed. I have been a hunter, camper, fisher, and have seen a lot of good land ruined every where the rigs go. Little Mountain has a lot of wild life, it is a good place for the beginner hunter to start their first hunt, and also for someone to has never seen big game, to get that chance. No matter what they say they can't replace, or fix what they ruin or take away from the mountain. Please exclude these parcels from the December 2<sup>nd</sup> 2008 auction.

Respectfully,

Hector Flores III

Dear Director Simpson:

I am protesting the sale of these parcels on Dec. 2, 2008. This mountain is used to provide many different recreational activities including hunting, fishing, fourwheeling, sight seeing, camping, and hiking. Many generations have enjoyed these activities. There are many more hunters and fishermen in the future to come, who will not be able to enjoy even the beauty after the land gets peppered with rigs, tanks and pipes sticking up out of the ground with pumps, buildings, and roads going every where. I have seen the Jonah Fields and the tanks between Little America and Kemmer. I see the rigs scattered across the mountains near Snider Basin. I have seen where the land has been supposedly reclaimed back to normal, and its never the same again. I don't want to see Little Mountain destroyed because of need for fuel. There are plenty of other areas and leases to be drilled without these parcels included. I would like to see this area undisturbed also for the animals, it is their home. The water is still good for their use.

Respectfully,

Dear Director Simpson:

I hereby protest the inclusion of the above referenced parcels in the lease sale advertised by the Bureau of Land Management on October 17, 2008. I request the above parcels be withdrawn from sale. I am 14 years old, and I killed my first elk on little mountain. I would like to hunt there again in the near future. I have seen what has happened up in Big Piney and by Kemmer its ugly when there is pipes and tanks every where. I have been learning in school that where they are drilling it contaminates the water supplies. I like fishing too, this water goes into the Flaming Gorge, I like to fish there too! This could kill the elk, deer, fish and any of the other animals in the area that drinks and uses the water. Please don't let the oil people buy little mountain on Dec. 2, 2008.

Respectfully,
