

Wind Energy Potential on BLM Lands with Minimal Constraints

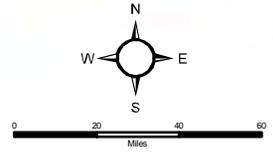

P:\wind_data\Available Wind Potential on BLM\10272010.mxd

Print Date: 10/28/2010

Wind Classes

Power Class	Resource Potential	50 m Wind Power Density (W/m ²)
7	Superb	> 800
6	Outstanding	600 - 800
5	Excellent	500 - 600
4	Good	400 - 500
3	Fair	300 - 400
2	Marginal	200 - 300

* This map displays wind energy potential on BLM lands with the following areas removed:

- Sage Grouse Core Areas
- National Historical Trails with .25 mile corridor
- Wilderness Study Areas
- No Surface Occupancy Areas
- Class I and II Visual Resource Management Areas
