

Bighorn Basin RMP Mineral Resources Leasable Oil and Gas Alternative C

Constraint

-  Closed
-  Open - Major Constraints
-  Open - Moderate Constraints
-  Open - Standard Restrictions
-  Non-BLM Mineral Estate
-  Billings Field Office Managed Area

Existing Leases and Wells

-  Existing Well
-  Existing Lease Area

Oil and Gas Management Areas

-  Oil and Gas Management Area
-  Master Leasing Plan

Note: Moderate constraints are any stipulations which may restrict the timing or placement of oil and gas development, but would not otherwise restrict the overall development. Moderate constraints include all TLS, CSUs, areas where surface-disturbing activity is avoided, and VRM Class II areas.

Major constraints are any stipulations which may restrict the timing or placement of oil and gas developments and may result in an operator dropping the development proposal. Major constraints include NSOs, areas of overlapping TLS that last more than six months, areas closed to surface-disturbing activity, and VRM Class I areas.
