**Subject:** Lander RMP comment

Greetings,

In response to your call for comments on the Lander Resource Management Plan, my organization urges you to pursue Alternative B. This alternative designates and manages Castle Gardens as an Area of Critical Environmental Concern. We feel that protecting the rock art at Castle Gardens should be a top priority for the Lander BLM. This unique historic and cultural resource is easily damaged and irreplaceable. Please continue your efforts to protect this site and to mitigate damage the site has sustained over the years, and please let me know if ARARA can be of any assistance in your efforts to preserve this important place.

Thank you.

Linea Sundstrom, Chair  
Conservation Committee  
American Rock Art Research Association
