It has been a while since I read the proposed plans for the new proposed RMP but I feel that option "A" would be my preferred option. As it already is, it is tough enough to deal with the South Pass ACEC. If I remember correctly in some of the options the maps don't even show any mining claims in the areas that I do have claims in. This is misinforming the public as to existing available information so I feel this is being intentionally swayed toward your preferred outcome. If all the information was correct then people could make an informed decision but this proposal is not the case. If this new RMP restricts or shuts down the mining of my claim then it will be a taking of mine and others personal property and us claim owners will have to be taken care of. This will be of great expense to the government!
