**Subject:** draft BLM Lander Resource Management Plan

As an heir to a ranch in Central Wyoming---regarding the draft BLM Lander Resource Management Plan. I am choosing Alternative C as most beneficial

Alternative C is the most utilization of resources with a more intensive human presence on the land to achieve management goals. If rangelands are not meeting Wyoming Standards for Healthy Rangelands, infrastructure including fences and water development projects are utilized along with livestock grazing management to improve conditions. No Areas of Critical Environmental Concern would be recognized under Alternative C
