RE: Comments on Lander RMP Revision & EIS

Total number of pages including this cover sheet: 1

Once again I find myself writing more letters on behalf of our nation's wild horses and burros. It seems the governments of the U.S. and states that are lucky enough to have these beautiful, intelligent, gentle animals are intent on torturing and killing them.

I and many others have been outraged by your on-going round up efforts, which terrorize, maim, exhaust and kill these creatures, all in the name of greedy ranchers who insist on taking over all available land for grazing. It's not enough that they get FREE ACCESS to vast acreage AND government subsidies; they won't be happy until all wildlife is gone. The horses that survive these cruel, barbaric round ups are doomed to spend their lives in cramped holding pens, going to slaughter houses, or to people who mistreat them.

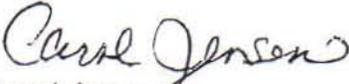

Livestock outnumber horses by 23 to 1 in the area being considered. If anything, the livestock should be removed!!

Wild horses have to contend with enough natural threats to their survival. They shouldn't have to deal with the intrusion and devastation by man.

The only alternative proposed that is supportable is Alternative B. The BLM has mandates to protect wild horses and burros. It's time you started enforcing this mandated instead of cow-towing to political pressures of ranchers.

Not only are the holding pens cruel, they are expensive to the tax payers. The entire round up process needs to be eliminated. Please don't try to tell me the horses and burros must be removed to "save" them from starvation. You can't sell that lie anymore.

Thank you.
