To whom it may concern,

After reviewing the BLM documents, I support Option B and hope that it will be the guiding principle for the Lander RMP. This option comes closest to fulfilling the BLM's mission "to sustain the health, diversity, and productivity of the public lands for the use and enjoyment of present and future generations" and protects those truly unique areas found within the Lander RMP. The Whiskey Mountain area is one of these truly unique places and its protection should be paramount. Not only does the Whiskey Mountain area possess incredible scenic beauty, but it also serves a vital role as winter habitat for wild game populations. Many of these populations like the bighorn sheep, elk and deer rely on this area for survival and damage to it would have lasting effects. Areas similar to the Whiskey Mountain area are increasingly rare, their protection is vital to the western heritage of the United States and they must be preserved for future generations. The Lander RMP contains many areas as vital as the Whiskey Mountain area and Option B represents the only option that will save "public lands for the use and enjoyment of present and future generations.

Thank you,

Pete Gosar
