

Dear *Sins*

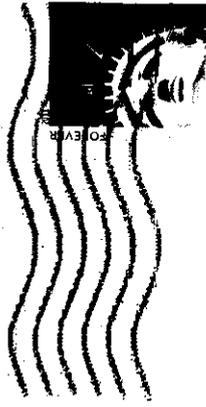

What ever happened to preserving and pride in our heritage? Only YOU can do something about this rape. The Bureau of Land Management is in charge of protecting the wild mustangs. Currently there are 34,000 captured horses in holding pens which we the tax payers are supporting. Before they were rounded up at \$400.00 a head---they ran free, as they have for centuries on Federal land and it cost us nothing.

I can just see a light bulb going off over some shyster's head--"Let's round them up and rent the land out---let's make money off this land." Now, I don't know who the original shyster was but I do KNOW who is perpetuating this scheme. Many horses have died because of the chase with helicopters. Some have been trucked away; is there a chance yet another dollar was made by sending them to slaughter? This is a war against a group of animals who has done nothing wrong except survive.

This travesty is all over the news. It's all over the blogs, but it appears you have not heard about the multiple court cases against BLM. Now that it has been brought to your attention, Please halt round ups NOW.

Sincerely a Tax payer,
Martha Miller
